

Multimodal Logistics Turkey traffic

Turkey is a major freight hub for transport between Europe and Asia, linking Western European economic centres with the countries of Southern and South-Eastern Europe. With our multimodal end-to-end logistics solutions, we transport your containers and swap bodies to and from important international freight terminals in Turkey such as Istanbul (Halkali) and Köseköy – reliably and efficiently throughout Europe.

Your benefits at a glance

- Plannable door-to-door service for you and your freight over long distances
- Non-stop connections with attractive transit times between the main industrial centres in Europe with end-to-end solutions including first and last mile – with transshipment options on request
- Assured capacity and universal equipment (swap bodies with side and top loading and unloading, containers, ...)
- Reliable and plannable departures ensure continuous factory supply – several times a week with defined timetables
- Handling of empty container supply as well as collection and delivery by truck to your end customer
- Sustainable transport solution with our 45ft HCPW containers by rail – and no loss of loading space
