

# TransFER Duisburg–Antwerp

The TransFER Duisburg–Antwerp connects the extensive industrial area of the Rhine-Ruhr region with the industrial companies in the Antwerp area. So it strengthens the connection to our entire European network and plays a central role for transports to and from Austria, Germany, Italy and the entire South/South-East European region as well as Scandinavia. Perfectly coordinated with departures and arrivals between Duisburg/Rheinkamp and Malmö, the TransFER ensures a seamless connection between Sweden and Antwerp.

## Your benefits at a glance

- Comprehensive end-to-end logistics solutions, including first and last mile organisation for the smooth transport of your goods
- Sustainable conventional wagonload and container transport – also suitable for dangerous goods (RID)
- Comprehensive additional forwarding services such as transshipment options, modern warehouse logistics and professional customs clearance
- Reliable and plannable transport solution with two round trips per week and a transit time of only approx. 7.5 hours on the same day (A-A connection)
